

This 1 day course will take place on Monday, 4<sup>th</sup> December at the CTICC (congress venue). It follows a well established format of didactic lectures and hands-on sessions, focussing on intra-operative imaging in brain tumor surgery and its evolving role. The faculty represents world leading experts in the field, presenting the unique opportunity for trainees and established neurosurgeons to interact with and learn from them. Spaces are limited, so please register early to avoid disappointment.
