

WFNS Neuroendoscopy Workshop will be hosted at the Surgical Skills Laboratory, Red Cross Children's Hospital on the 3rd December 2023. The workshop will be hosted by the WFNS Neuroendoscopy committee and supported by several leading international and national faculty. All the course faculty are renowned leaders in the field of intracranial and intraventricular neuroendoscopy.

The workshop is aimed at neurosurgery trainees as well as experienced neurosurgeons looking to enhance their experience and exposure to neuroendoscopy.

The workshop would be open to all participants of the WFNS 2023 congress. In particular we would like to encourage attendance by doctors from low and middle income countries (LMICs).

The programme will run over 1 day and include didactic lectures and hands-on sessions covering basic and advanced neuroendoscopic techniques.

The workshop will be limited to 20 spaces, so please book early to avoid disappointment.

Sincerely

Llewellyn Padayachy

Course Director
